NOTE FOR: Mr. Robert M. Gates
Deputy Director for Intelligence

Bob

I greatly appreciate your forwarding the Directorate of Intelligence Research Program for 1986. You have definitely set forth an ambitious program. I was gratified to see the continuing focus on technology transfer which has always been of particular concern to me. Likewise, your new approach to meeting the challenges posed by global terrorism and your continuing efforts against international narcotics should prove very beneficial in aiding policymakers to cope with these most vexing problems.
